

X3 System™

Cost-Effective, Modular Vending

The CribMaster X3 System is a customizable, modular vending solution that allows secure dispensing anywhere in your operation. The flexibility of the system improves workflow by allowing authorized users easy access to their high-use inventory within reach at the point of use. Each helix or carousel module can be vertically stacked in a small footprint to create satellite vending of your tool crib inventory. The inventory management software behind the system provides the critical data needed to accurately manage any type of indirect material.

- Cost-effective indirect material management
- Expandable modular design for maximum flexibility
- Easy access to high-volume inventory
- Combines helix and carousel modules in a single footprint

X3 System Configurations

The X3 System comes in main and auxiliary units, same as their full-sized ToolBox and ProStock counterparts. This expandable cost-effective solution allows you to choose the modules and configurations to best meet your needs.
